★ 1993: CAS, Harvard University, Cambridge, MA  
**INTERESTS:** Gardening, Quantum Physics and being a Dad  
**STRANGE COINCIDENCE:** Michael and his wife, Angie, share the same birthday

Michael Jingoian is a man of many pursuits. He is an entrepreneur, an employer, and a father – but most of all he is a concerned citizen. He believes that when you let go of the past, opportunities emerge that would normally not be possible.

As early as 17, Michael showed his political gall by initiating a bill that would put a student representative on every local school board and testifying before the Massachusetts State Legislature. His early exposure to the American political system resulted in total disillusionment, and he decided that to be a transformative voice in politics, he would first need to achieve success in academia and business.

To that end, Michael received his B.S. in Economics (Honors Recognition) from New York University. He graduated with a 4.0 in his major and received the Best University Thesis Award (not awarded every year). He subsequently earned a MBA from Bentley College and a CAS from Harvard University.

In 2001, Michael founded AngelVision Technologies, Inc. Each year since it was established, AngelVision has increased revenues between 170% to 350% per year, making it likely the fastest growing Interactive Media firm in the US. AngelVision is recognized as one of the nation's best run companies and has won over 15 regional and national awards including:

- 2006 – InnoTech Innovation of the Year Award
- 2006 – The American Marketing Association MAX Award (1<sup>st</sup> Place for Excellence in Marketing)
- 2006 – Two Telly Awards for Interactive Marketing
- 2007 – Repeat Finalist for The American Marketing Association MAX Award
- 2007 – Three Internet Advertising Awards
- 2007 – Two Summit International Marketing Awards
- 2007 – American Business Stevie Award for Best Interactive Media Company for Business & Government
- 2007 – Five Telly Awards for Best Internet / Online Commercial

In addition to developing their revolutionary "Impact Movie" technology, Michael pioneered a holistic management philosophy that has allowed AngelVision to experience unprecedented growth. His management style led AngelVision to be voted one of Oregon's "15 Best Small Companies" (as well as the youngest company on the list), and the company with the 3<sup>rd</sup> Best Benefits Package in the state: all this in an industry where most of AngelVision's competitors send their production overseas. In 2006, Michael was the recipient of the *Pinnacle Award for Outstanding Mentoring of Fellow Professionals*.

Michael's academic, business, and personal experiences have shaped his beliefs in human nature and organizational dynamics. According to Michael, "Our current 2-party system is destroying our freedoms, our sovereignty and our children's future." Because of his deep concern for our nation and planet, he founded RESET America to educate citizens about the urgent need to transform our government. RESET America is headquartered in Portland, Oregon, and employs 5 full-time "political misfits."

You can read more about Michael Jingoian, RESET America, and AngelVision at: [www.ResetAmerica.com](http://www.ResetAmerica.com) and [www.AngelVisionTech.com](http://www.AngelVisionTech.com). Michael welcomes all ideas and thoughts regarding empowerment, sustainability, and responsible government.
